

Graduating Kindergartners Parents

Dear Parents, Please consider St Anthony in your choice of schools for providing your children with a special kind of academic excellence that fosters a community grounded in faith. It has provided quality education for the community for 60 years. As a parent of a kindergartner, I can tell you I am so very happy with what my daughter has receive at St. Anthony's. I considered my daughter to be very shy. But she has thrived this year. Her teacher has done an excellent job of even preparing these children for speaking in front of others. She had my daughter speaking in front (by herself) of rather large groups in both the Christmas programs and at church masses. Many children in class did this. I attribute it to the teacher's great approach. My daughter academics seem to be doing very well. She enjoys her classmates and loves her teacher Mrs. Espinola. We do too! She participated in cross country as a Kindergartner and wants very much to do it again next year. We also appreciate the schools accent on service to others, leadership skills and emphasis on moral development as well as its balanced curriculum that includes art music and fitness. We are comforted that St Anthony goes all the way up to 8th grade and that it is a small school which offers a special element to the school. My daughter and I originally visited last year's kindergartner's class and Mrs. Espinola welcomed us with open arms and showed us around to see what they do in their kindergartner class. They were all reading! We made our decision. There is still time this year to get a chance to see what they are doing in kindergartners class.. Please don't hesitate to do the same so you can see how wonderful the school is.

Happy Parents,

Toni and Dennis Haines
